## District Contacts for Summer School Courses & Registration

The following school districts are pleased to offer courses to students who are in need of credit recovery, or would like to maintain their skills over the summer break. All courses are offered online and are open to students in all districts. Some courses may require students to meet face-to face for assessment. Please see the individual course description to determine if this is a requirement of the course. Courses listed are for the purpose of credit-recovery, skill-maintenance, or both. Credit recovery courses are NOT an equal replacement for taking a course during the school year. This means that in order to be eligible for a credit recovery course, a student must have first taken the course and failed it during the regular school year.

For students who are taking courses for credit recovery, please have your local guidance counselor confirm that the course meets the district's requirements for credit. ***Please do not call the district that is offering the course to see if that course will be accepted for credit by your local district.*** Only your local guidance counselor or principal can make that decision.

To register for summer school courses, or to obtain more information, please contact the district liaison listed below. To register your child, please visit the district website from which you would like to take the course. Depending on the number and type of courses you are taking, you may need to register on several district sites.
